Rawera Daniel
Full-Stack Developer

SUMMARY

Results-driven full-stack developer specializing in front-end development with React, Next.js, Tailwind CSS, and styled-components, complemented by expertise in Node.js, Express, and MongoDB. During a remote internship at Atomic, I enhanced their SaaS platform with front-end features (e.g., page builder elements, forms, and data display adjustments) and resolved critical back-end bugs related to API requests and incorrect data retrieval. Committed to delivering clean, maintainable code and continuously improving through project-based learning.

WORK EXPERIENCE

Front-end Developer at Atomic | Remotely (Internship)

February 2024 — September 2024

– Developed and implemented 3 new features (e.g., text editor, data filtering, form and text input element) using React and Styled Components based on Figma designs.

– Debugged data retrieval and API integration issues affecting data handling and API integration, simultaneously improving code reusability by refactoring repeated logic and features into shared functions.

– Collaborated using GitHub, Trello and Teamhood

Facility intern & Junior Administrative Specialist at GIZ African union | Addis Ababa, Ethiopian

March 2021 — November 2022

– Coordinated with cross-functional teams to ensure smooth daily operations and effective workflow between departments.

Recent Projects:

The-wild-oasis | Internal dashboard for hotel management

– **Tech Stack:** React, Styled Components, JavaScript, Supabase (Backend & Database)

– Built dashboard displaying dynamic statistics on sales revenue, occupancy, and guest check ins/outs.

– Implemented full CRUD functionality for managing hotel cabins and bookings.

– Integrated user authentication, profile customization, and dark mode features.

– **GitHub:** https://github.com/rawera-daniel/the-wild-oasis

– **Live Demo:** https://the-wild-oasis-rawera.vercel.app/

Fast React Pizza | Pizza ordering website

– **Tech Stack:** React, Tailwind CSS, JavaScript, Redux Toolkit

– Developed a front-end ordering system allowing users to select pizzas, manage their cart, provide contact details.

– Implemented features for priority ordering, real-time delivery estimates, and order tracking lookup by ID.

– Managed application state efficiently using Redux Toolkit for cart and order data.

– **GitHub:** https://github.com/rawera-daniel/Fast-react-pizza

– **Live Demo:** https://fast-react-pizza-jet.vercel.app/
